TOA JOVAN, MASTER OF MAGN

Jovan led the first Toa team to find the Kanohi Mask of Life, thousands and thousands of years ago. A Toa of Magnetism, he carried a zamor sphere launcher and a magnetic bolt launcher. Jovan later became Turaga of Voya Nui and was killed in the cataclysmic event that separated the island from its home continent. Jovan wore the Kanohi Mask of Flight.

ETISM

Build Toa Jovan, legendary master of magnetism, using pieces from 88729 Toa Nuparu, 88730 Toa Hewiki, and 88728 Toa Hokli.

SECRETS OF THE TOA INIKA!

FROM THE CHRONICLES OF HAHU

It's strange and amazing thing has happened! I and five of my Matoran friends journeyed to the island of Voya Nui. When we arrived, bolts of lightning from a mysterious red scar transformed us. Now we are Toa Inika – and unlike any heroes ever known before. ■

TOA JALLER

Light-Up Weapon

Our Toa weapons are charged with incredible energies that make them light up when in use.

TOA HAHU

New Armour

Toa Inika armour is quite different from any seen before, designed to contain the energy that courses through our forms.

8728

TOA NUPARU

New Kanohi Masks

The masks we wear are very different from any Toa masks we have seen before, with awesome new abilities.

8729

TOA KONGU

8731

Zamor Sphere Launcher

Our Matoran friends on this island crafted zamor sphere launchers for us. They hurl spheres that can free the villagers of Voya Nui from enslavement.

TOA MATORO

Glow in the Dark Heads

Now filled with the energies of the lightning, even our features glow brightly

TOA HEWKII

New Colours

Even the colours of our armour were changed by the lightning. Toa Hewkii is the first Toa of Stone in memory to be a shade other than brown.

MAKING OF THE EXO-FORCE

BEHOLD THE POWER DARK SIDE!

Imperial Star Destroyer™ 5211

The mighty Star Destroyer is the signature vessel of the Imperial space fleet. Its immense size and triangular shape summon both fear and awe in the inhabitants of the many worlds of the Galactic Empire. Fueled by a solar ionization reactor with the energy output of a miniature sun, its hyperspace drive can take it quickly across the galaxy at the Emperor's command.

Constructed at the famous Kuat Drive Yards, the Imperial Star Destroyer stretches 1,600 meters (5,249 feet) long. Its armored surface bristles with powerful turbolaser batteries and ion cannons, and a standard vessel carries a full complement of Stormtroopers, AT-A7 and AT-ST walkers, transport shuttles and TIE fighter squadrons, all of which can be deployed at a moment's notice to squish Rebel uprisings. Any ship that attempts to escape the Empire's clutches is quickly snared with a tractor beam and towed into the hatch below.

Having a subtle ally like the Rebel Alliance? Launch the escape pod to make your getaway.

Take command with the Empire's fleet. The dreaded Grand Admiral Tarkin (a four-year LEGO minifigure) directs the battle from the command bridge.

Take aboard Rebel scout Turbolasers ready fire!
